

TO: All Contractors, Service Companies and Operators in the Trinidad & Tobago Energy Sector

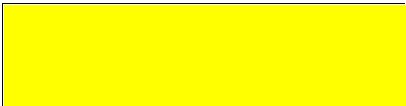

FROM: STOW Implementation Board

DATE: 1st July 2023

RE: RAL Recommended Colour Codes for Portable Lifting Appliances and Accessories, Including Slings in the T&T Energy Industry (Advisory #30/2023).

The STOW Implementation Board wishes to remind all contractors and operators that effective June 1st 2020, the colour coding for the certification of **portable lifting appliances and accessories, including slings** was realigned to conform with the RAL colour codes <https://www.ralcolorchart.com/about-ral-colors> as indicated below. This colour pattern will repeat for subsequent two-year periods.

The recommended colour for the next period 01st July – 31st December 2023 is **Luminous Yellow (RAL 1026)**.

Colour	Description & Code	Period
	LUMINOUS YELLOW RAL 1026	1 st July 2023 - 31 st December 2023
	PEARL GREEN RAL 6035	1 st January 2024 - 30 th June 2024
	PURPLE VIOLET RAL 4007	1 st July 2024 - 31 st December 2024
	YELLOW ORANGE RAL 2000	1 st January 2025 - 30 th June 2025

On computer screens RAL colours do not appear completely authentic. Use the colour impression on this page as a reference only.

STOW is an industry initiative comprising companies in the Association of Upstream Operators of Trinidad & Tobago, the Point Lisas Energy Association and The Energy Chamber of Trinidad and Tobago to bring about greater uniformity in Health, Safety and Environmental (HSE) practices in the energy sector, with the objective of improving overall HSE performance and assisting smaller companies in doing business in the energy sector.
